## *NATIA SPECIAL EDITION*

# *SSABR*

### *SSABR™ to Debut at NATIA 2001*

Digital Audio Corporation, the world leader in forensic audio technology, proudly introduces SSABR - the state-of-the-art, body-worn digital recorder specially designed for collecting accurate, covert recordings. Its rugged, lightweight, compact size, combined with easy to use software make SSABR the clear choice for forensic and intelligence applications. Key features of the SSABR include:

- DACPak lossless compression algorithm provides optimal compression with *no data loss*
- Use built-in or external microphones to record in mono or stereo modes
- Available in 256MB and 512MB configurations
- Local playback without erasing the evidence
- Record up to 12 hours on a single AA battery
- Windows®-based control software for easy setup and download
- Actual size: 2.4" x 2.4" x 0.65"

In addition to SSABR, DAC will also be introducing the following new products for Fall 2001 shipment:

#### *QuickEnhance*

The QuickEnhance QE-10 Spectral Filter System is the new standard for easy-to-use digital audio filtering. The QE-10 attacks a wide array of noises including AC Hum, static, hiss, engine sounds, and reverberations. Its affordable price and simplified controls make the QE-10 a must for every agency!

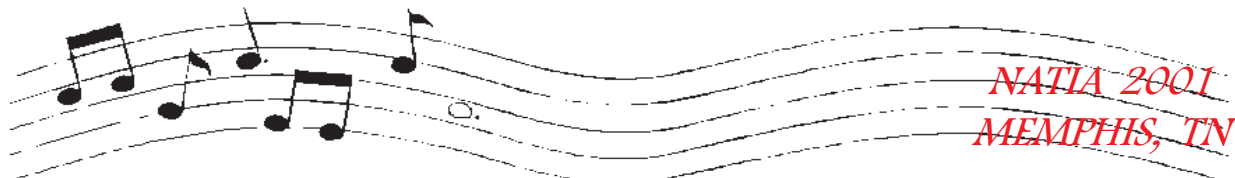

#### *ProbeAmp*

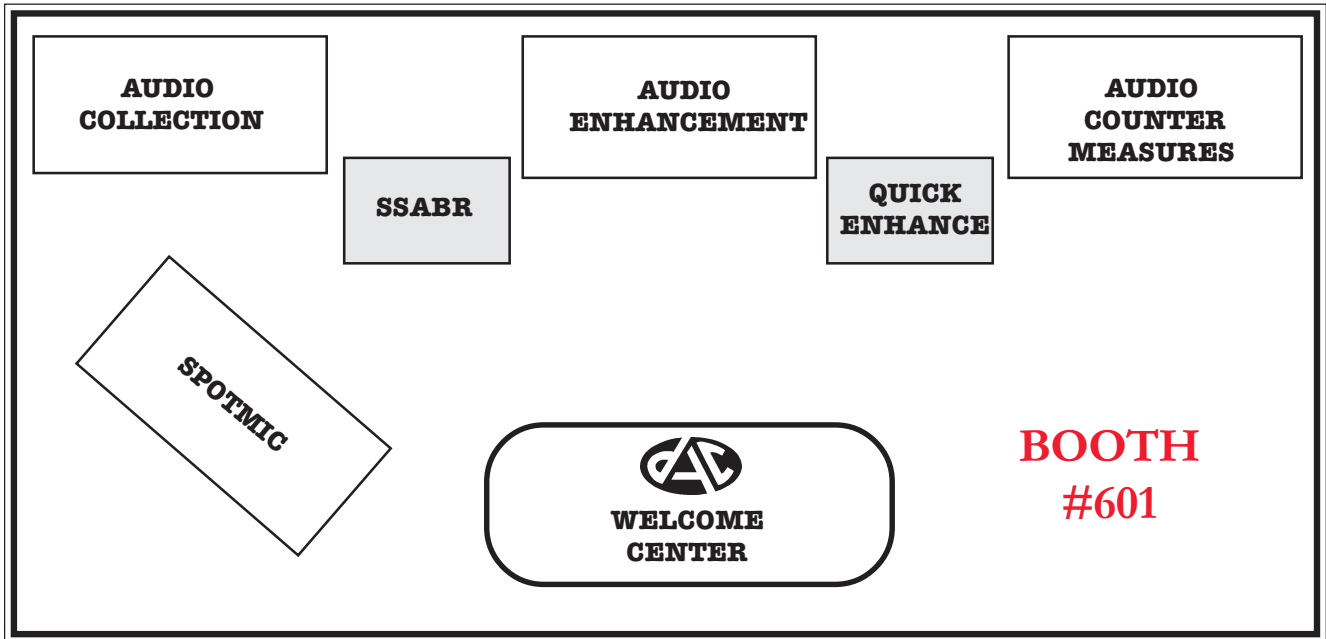

ProbeAmp, our newest countermeasures device, is a high-gain amplifier with bandwidths up to 100 kHz and a built-in multi-meter for voltage measurements.

#### *UltraScope*

UltraScope, DAC's newest ultrasonic acoustic detection device, allows you to hear and visualize audio signals up to 200 kHz.

***Stop by the DAC booth for a demonstration of SSABR and other exciting DAC products!***

DAC is eagerly anticipating your visit to Booth #601 at NATIA 2001, July 31 - August 3 in Memphis, TN. See demos of several new products, try out that PCAP you've always wished for, register for giveaways, and meet DAC personnel.
