### Subject: Installing QuickEnhance/AS in the Avid Media Composer Environment

Problem: QuickEnhance/AS does not show up in the Avid Media Composer AudioSuite plugin list. This is a result of Avid Media Composer looking in a different directory for plug-ins than older Avid products.

#### Resolution:

1. Shutdown Avid Media Composer.
2. Double-click on My Computer.
3. Navigate to C:\Program Files\Digidesign\DAE\plug-ins
4. Highlight QuickEnhance.dpm and QuickEnhance.dpm.rsr files. Select Edit->Copy from menu.
5. Navigate to C:\Program Files\Common Files\Digidesign\DAE\Plug-Ins
6. Select Edit->Paste from menu. Verify that both QuickEnhance files are now in this directory.
7. Restart Avid Media Composer.
