

Millimeter Wave Solutions

Innovation in Millimeter Wave Measurements

OML is a premier supplier of innovative millimeter and sub-millimeter wave frequency extension products for vector network analyzers, scalar network analyzers, spectrum analyzers, converters, and signal generators. Our solutions empower engineers in R&D and manufacturing to pursue opportunities in emerging applications spanning radio astronomy, communication, imaging, space research, biomedical and homeland security.

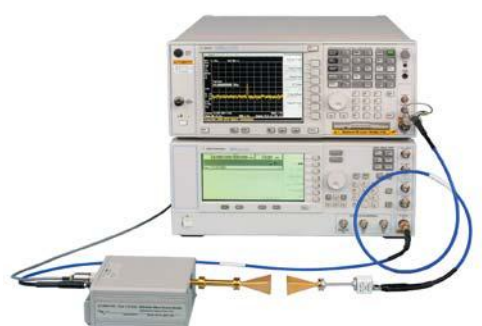

Vector Network Analyzer

Signal Generator

Spectrum Analyzer

WR15

50-75 GHz

WR12

60-90 GHz

WR10

75-110 GHz

WR08

90-140 GHz

WR06

110-170 GHz

WR05

140-220 GHz

WR03

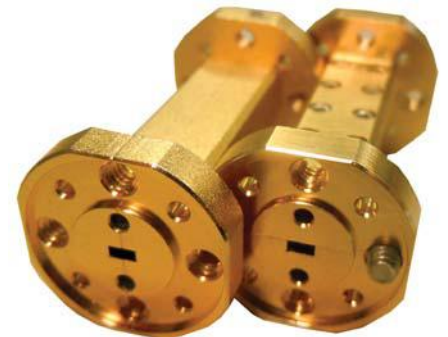

220-325 GHz

WR02.2

325-500 GHz

Premium Waveguide Assemblies, Components & Accessories

OML has been exploring the millimeter wave frontier for more than 20 years. As a result, our innovative solutions fulfill emerging test & measurement needs. Our success is from collaborative efforts that optimize solutions for price and performance trade-offs. Beginning in 2013, our leadership includes offering the industry's first millimeter RoHS compliant products. Together, we are building a prosperous millimeter wave ecosystem! Contact OML to continue the journey with us.

Universal Compatibility

OML is a global supplier of millimeter wave solutions. This test & measurement expertise spans the gamut of all instrument classes and vendors. Our success stories are compatible across modern platforms from Rohde & Schwarz, Anritsu and Agilent. As a highlight, OML is an Agilent Solutions Partner.
